Dashboard and reports

What each screen of the One Eleven CRM shows, and how to read it

The dashboard and 8 reports, with screenshots

October 2026

Prepared by ErgonSite

How to read this guide

Part 1 explains the dashboard, panel by panel. Part 2 takes each report in turn: what it is for, what every figure means, and a screenshot of every chart and table, with a short explanation under each. Where a figure needs care, for example VAT, cash or shares, the explanation is longer.

The screenshots were taken on a test copy of the CRM filled with made up records, so the names and amounts are examples only. Some test figures look unusual on purpose, such as a constructor paid more than agreed, so that every case shows on screen.

Rules that hold everywhere

- **Always up to date.** Every page reads the database each time it opens. A payment saved a second ago is already counted; an open tab only needs a refresh.
- **Money counts on its own date.** A payment counts on the day it was paid, not the day it was typed in. A payment dated last year falls in last year's month.
- **VAT.** Each figure says whether VAT is included. Cash never carries VAT and is always shown apart from the payments on the contract.
- **Cancelled contracts** are left out of what is agreed and owed, and shown on their own where they matter.
- **Recording history.** Old records entered while Recording history is switched on in Settings count in the reports like any other money. They only skip invoices, emails and the Needs attention list.

The filters at the top of every report

Period	Last 12 months, Last 24 months, This year or Everything. Or type a From and To date and press Show.
Projects, Company	Dropdowns where several can be ticked at once. The page updates when the dropdown closes. Nothing ticked means everything.
Reset everything	Puts every filter back to the report's starting point.
Download as CSV	Where offered, saves the figures for Excel, with the same filters.
Tables	Click a column heading to sort by it. Long tables show 10 rows a page with page numbers underneath.

PART 1

The dashboard

The first page after signing in. On the left is what needs doing, on the right the money at a glance, and under them the apartments, the months, the latest payments and what the team did lately.

Projects and Company filters

Tick one or more developments, or a company to see the developments it holds, then press Show. The money cards, the apartments table, the month by month table and the recent payments follow the choice. The Needs attention list always covers the whole office.

Arrange

The Arrange button lets each user put the panels in their own order: drag a panel by its handle or use the arrows, and the eye puts a panel away without losing it. The arrangement is saved for that user only, and "Back to the standard layout" undoes it.

Needs attention

Everything waiting for someone, grouped by kind. Each group shows how many there are, the first 5, and a "more" link that opens the full list. **Since** is the date the matter started, and **Amount** is the money concerned. The red number on the bell at the top of the page is the same count. The kinds are:

- Installments overdue
- Company invoices overdue
- Paper sent with its invoice, not paid yet
- Paid, waiting for the signed copy
- Building stage without certificate or photographs
- Commission without the agent's invoice or receipt
- Buyer payment without invoice or receipt
- Company invoice with a paper missing
- Constructor payment without invoice or receipt
- Follow ups overdue, still pending
- Appointments nobody answered
- Leads waiting
- Contracts still drafts
- Automatic emails that failed

An item leaves the list by itself once it is dealt with, for example when the missing receipt is uploaded.

The four money cards

Collected this month — What buyers paid on their contracts since the 1st of this month, VAT included, cash not included, with the number of payments.

Collected — Everything buyers have paid on their contracts so far, VAT included, cash not included.

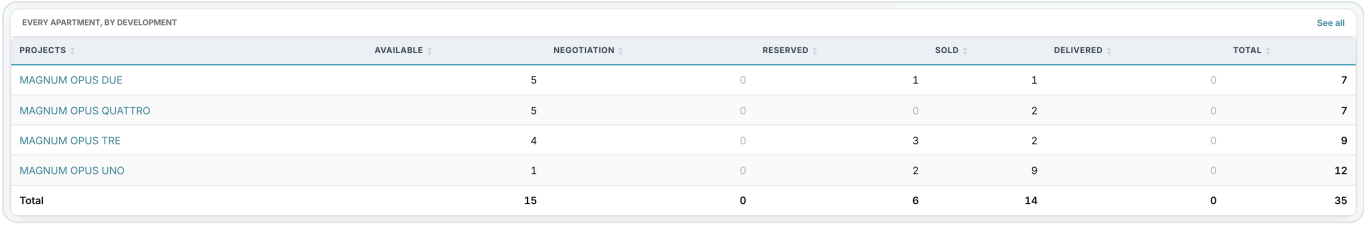

Outstanding — What is still to come on the contracts that stand, VAT included. The card turns red when an installment is overdue.

Cash received — Cash received from buyers, with the cash still to come written under it.

Each card opens the Apartment Sales report for the detail.

Every apartment, by development

One row per development and one column per status: Available, Negotiation, Reserved, Sold and Delivered, with the totals. It shows where every apartment stands today. "See all" opens Apartment Sales.

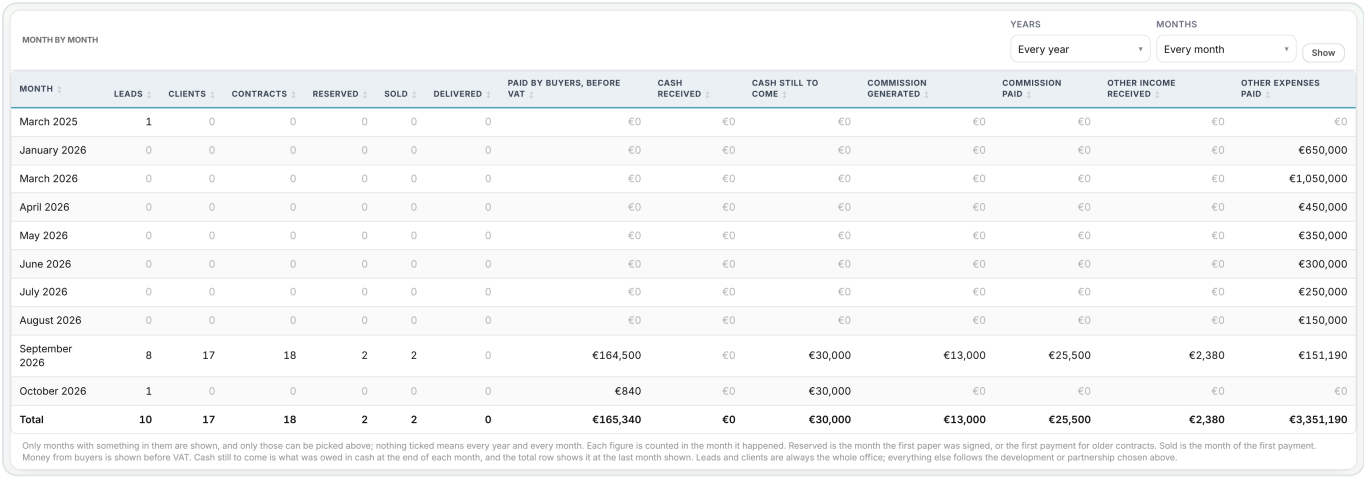

EVERY APARTMENT, BY DEVELOPMENT — See all

PROJECTS	AVAILABLE	NEGOTIATION	RESERVED	SOLD	DELIVERED	TOTAL

MAGNUM OPUS UNO	1	0	2	9	0	12
Total	**15**	**0**	**6**	**14**	**0**	**35**

Month by month

One row per month, with a total at the bottom. Only months that have something in them are shown. The **Years** and **Months** dropdowns offer only the years and months with data, and several can be ticked.

Only months with something in them are shown, and only those can be picked above; nothing ticked means every year and every month. Each figure is counted in the month it happened. Reserved is the month the first paper was signed, or the first payment for older contracts. Sold is the month of the first payment. Money from buyers is shown before VAT. Cash still to come is what was owed in cash at the end of each month, and the total row shows it at the last month shown. Leads and clients are always the whole office; everything else follows the development or partnership chosen above.

Leads, Clients	New leads and new clients that month, always for the whole office.
Contracts	Contracts created that month.
Reserved	The month the first paper was signed, or the month of the first payment for older contracts.
Sold	The month of the first payment.
Delivered	Apartments handed over that month.
Paid by buyers, before VAT	What buyers paid that month, with the VAT taken out.
Cash received	Cash received that month.
Cash still to come	The cash owed at the end of that month. The total row shows it at the last month shown, not added up.
Commission generated	Commission earned by agents that month.
Commission paid	Commission paid to agents that month.
Other income received	Money received on our companies' own invoices.
Other expenses paid	Bills paid and payments to the constructors marked Paid.

Recent payments

The last 12 movements of money, newest first: buyers' payments and cash, commission paid to agents, payments to the constructor, income on our invoices and expenses we paid. `In` is money received, `Out` is money paid. Click a name to open its record.

From lead to buyer

How far the leads got: all **Leads**, those **Picked up** (no longer New), **Qualified**, and those that **Became clients**, each with its share of all leads. "See all" opens the Leads report.

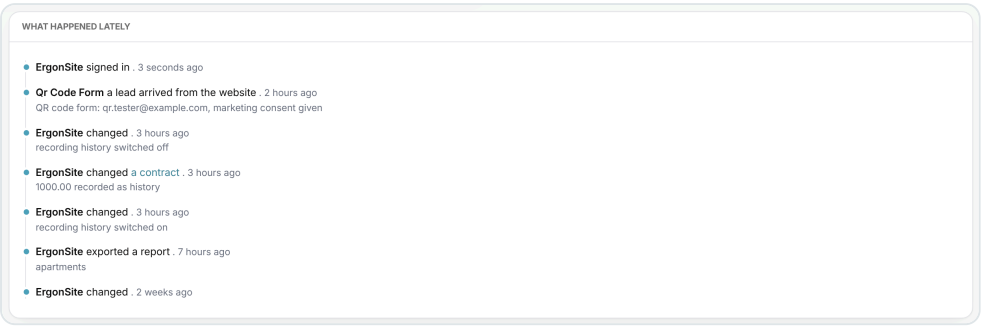

Birthdays this week

Clients whose birthday falls in the next seven days. "See all" opens the birthday emails page.

What happened lately

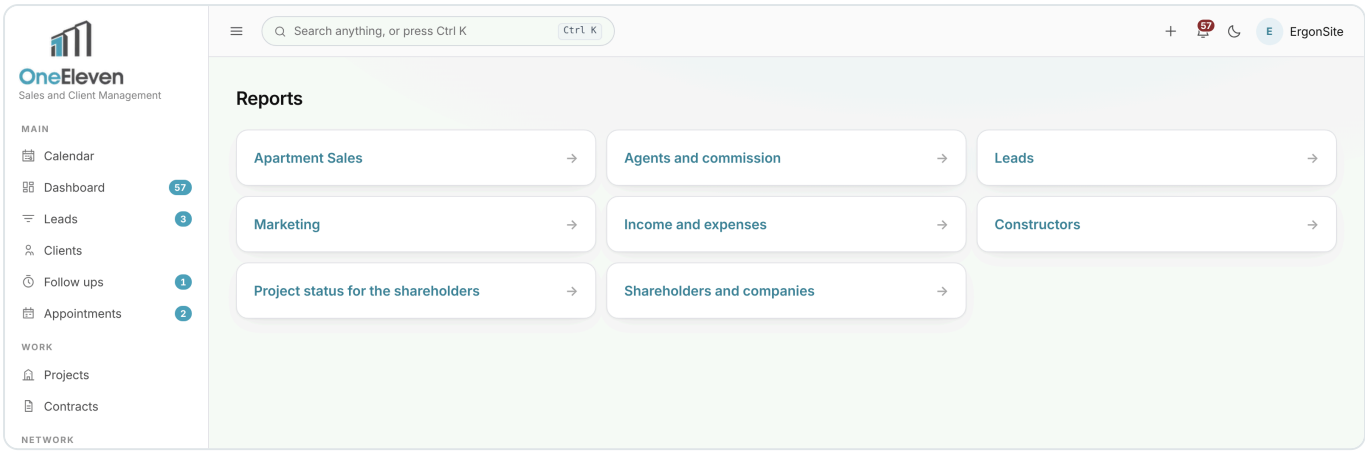

The latest actions in the CRM: who signed in, who added or changed a client, a contract or a company, which report was downloaded, and the leads that arrived from the website or the QR form, with how long ago.

PART 2

The reports page

Reports in the menu opens the list of the eight reports. Click a name to open it. Each report has its filters at the top, its main figures under them, then its charts and tables.

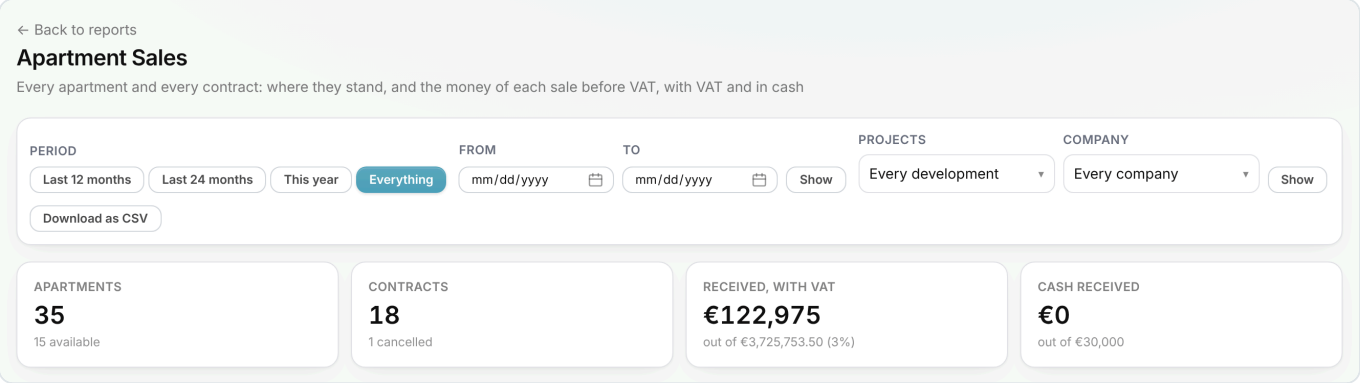

REPORT 2.1

Apartment Sales

Every apartment and every contract in one place: where they stand, and the money of each sale before VAT, with VAT and in cash, always shown as received out of agreed.

How the period works here

The period picks the **contracts**, by their contract date. The money is every payment those contracts have had, whenever it arrived. The apartments table always shows today. The report opens on Everything.

Apartments	All apartments in the developments chosen, and how many are available.
Contracts	Contracts in the period, and how many of them were cancelled.
Received, with VAT	What buyers paid, VAT included, out of the price agreed with VAT, and the percentage.
Cash received	Cash received out of the cash agreed.

Apartments by status, today

The same table as on the dashboard: each development against Available, Negotiation, Reserved, Sold and Delivered.

PROJECTS	AVAILABLE	NEGOTIATION	RESERVED	SOLD	DELIVERED	TOTAL
MAGNUM OPUS DUE	5	0	1	1	0	7
MAGNUM OPUS QUATTRO	5	0	0	2	0	7

MAGNUM OPUS UNO	1	0	2	9	0	12
Total	**15**	**0**	**6**	**14**	**0**	**35**

Contracts by stage

How far each contract has got: Negotiation, Reservation signed, Contract of sale signed, Paid in full, Delivered, or Cancelled. Each contract is counted once, at the furthest stage it has reached.

CONTRACTS BY STAGE

PROJECTS	NEGOTIATION	RESERVATION SIGNED	CONTRACT OF SALE SIGNED	PAID IN FULL	DELIVERED	CANCELLED	TOTAL
MAGNUM OPUS DUE	1	0	0	0	0	0	**1**
MAGNUM OPUS QUATTRO	0	2	0	0	0	1	**3**

Total	**16**	**2**	**0**	**0**	**0**	**1**	**19**

The money of the sales

The core of the report. For each line, what was **Agreed**, what was **Received**, what is **Still to receive**, and the **% received**.

Before VAT	The price without VAT. Each payment is split by its stage's share, so the VAT is taken out at the rate that applies to it.
VAT	The VAT part of the agreed price and of what was paid.
With VAT	Before VAT plus VAT: what the buyer pays on the contract.
Cash	The cash agreed beside the contract. It has no VAT.
With VAT and cash	Everything together.

Cancelled contracts are left out here and shown on their own in the next table.

THE MONEY OF THE SALES

	AGREED	RECEIVED	STILL TO RECEIVE	% RECEIVED
Before VAT	€3,456,450	€110,340.34	€3,346,109.66	3%
VAT	€269,303.50	€12,634.66	€256,668.84	5%
With VAT	**€3,725,753.50**	**€122,975**	**€3,602,778.50**	**3%**
Cash	€30,000	€0	€30,000	0%
With VAT and cash	**€3,755,753.50**	**€122,975**	**€3,632,778.50**	**3%**

Contracts that stand. Cancelled contracts are left out of what is agreed and shown on their own beside. Before VAT is each payment at its stage's share before VAT.

Changes to the sales

What changed a sale after it was signed. These count every contract, cancelled ones included.

Reduced VAT approved	How many contracts got the reduced VAT rate, and the VAT saved against the standard rate.
Credit notes issued	Credit notes given to buyers, usually after a reduced rate was approved.
Penalties paid to buyers	Delay penalties paid back to buyers.
Refunds paid to buyers	Other money paid back to buyers.
Cancelled contracts	How many were cancelled, and the money that had been received on them.
Overdue	Installments past their due date and not paid.

CHANGES TO THE SALES

Reduced VAT approved	1	€35,000
Credit notes issued	2	€62,475
Penalties paid to buyers		€1,500
Refunds paid to buyers		€0
Cancelled contracts, money received on them	1	€57,750
Overdue		€0

Reduced VAT shows how many contracts have it and the VAT saved against the standard rate. Credit notes, penalties and refunds count every contract, cancelled ones included.

By development

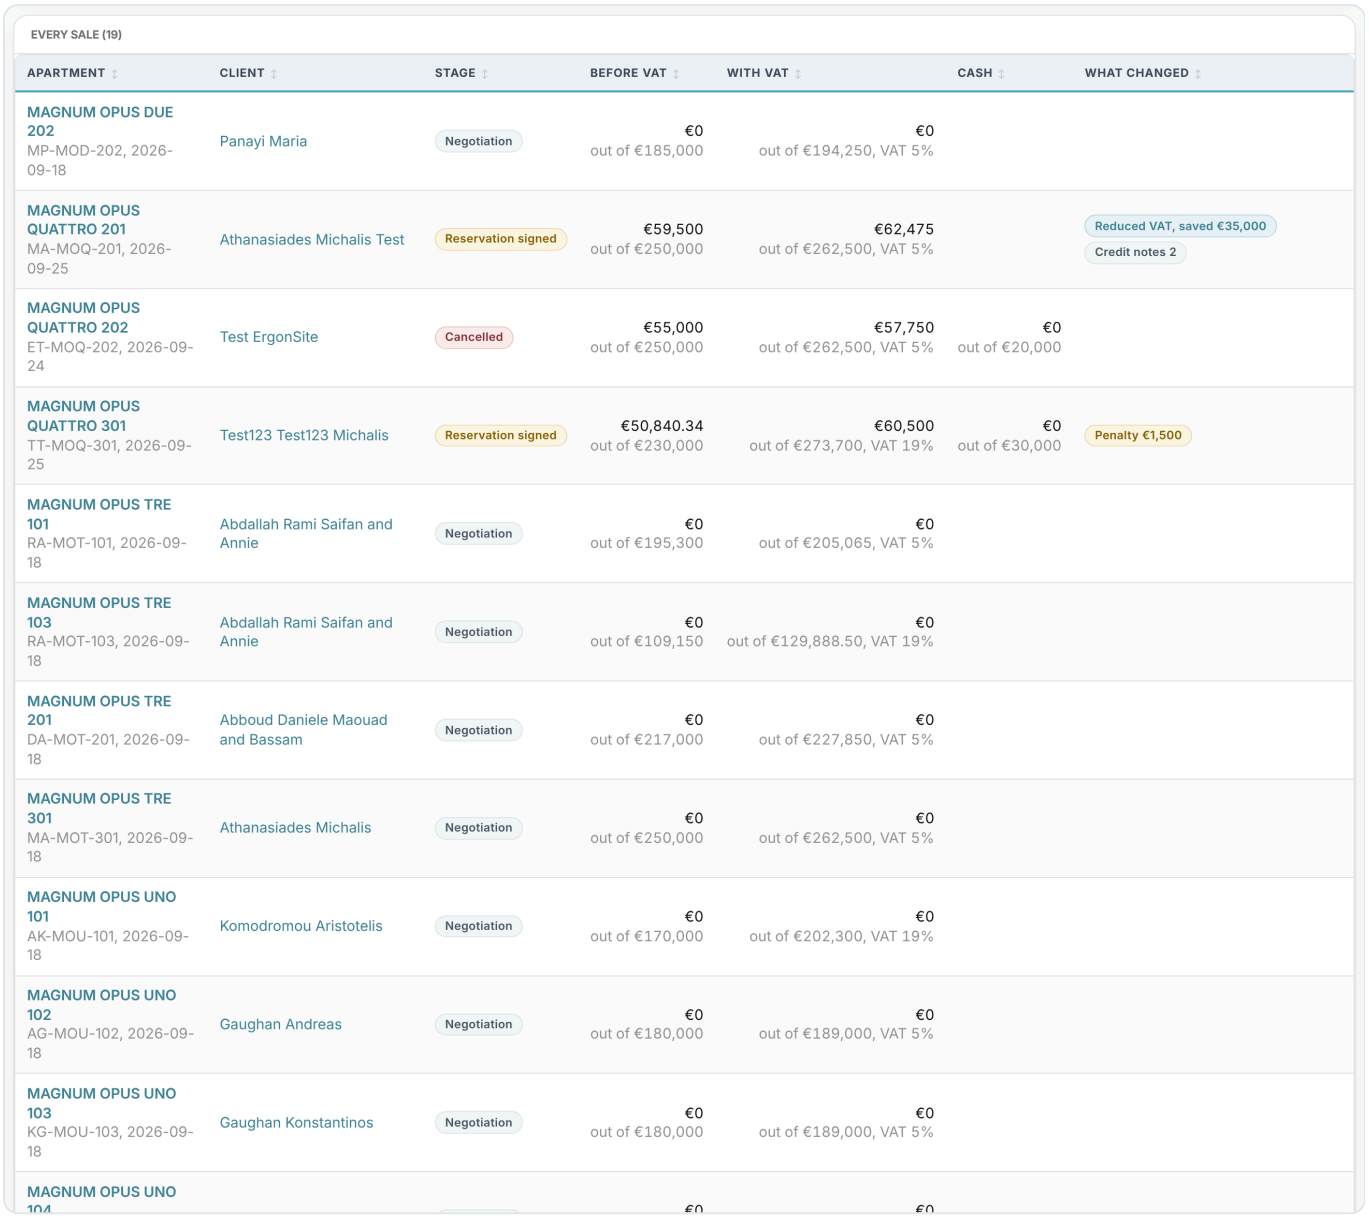

The same money, one row per development. Each amount shows what was received with "out of" the agreed amount under it. Also shown: the number of contracts (and cancelled ones), reduced VAT approvals with the VAT saved, penalties and refunds, and what is overdue.

BY DEVELOPMENT

Every sale

One row per contract: the apartment and its code, the client, the stage, the money before VAT, with VAT (with the VAT rate) and in cash, each as received out of agreed. **What changed** shows a reduced VAT approval and the VAT saved, credit notes or a penalty. Click the apartment or the client to open it. The screenshot shows the start of the table.

REPORT 2.2

Agents and commission

Who sold what, what it earned them and what is still owed. The report opens on the last 12 months; the screenshots show Everything.

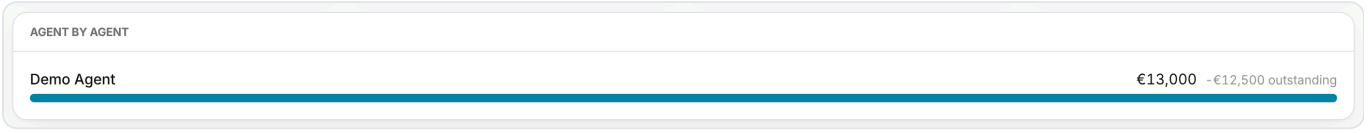

Signed for	The value of the sales the agents brought in during the period.
Commission generated	Commission earned in the period, before VAT.
Commission paid	Commission paid to agents in the period.
Outstanding	Generated less paid. It can be negative when commission earned before the period was paid during it.

When the Company filter is set to One Eleven's own books, the commission figures read zero, because a commission is the expense of the company that holds the development. A note on the page says so.

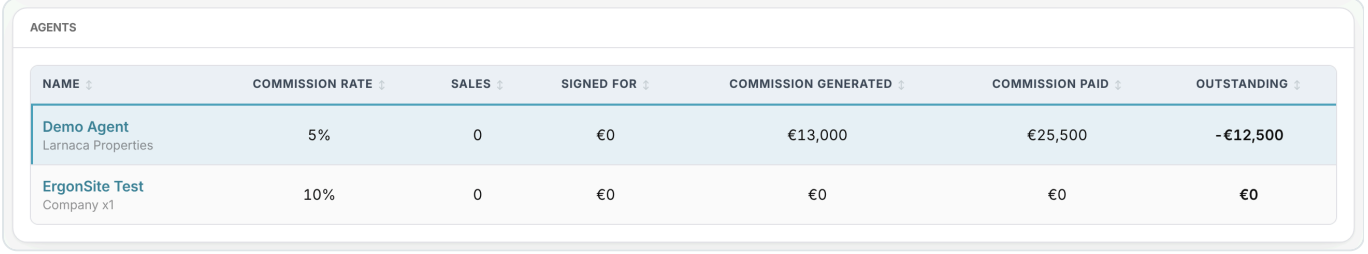

Agent by agent

A bar for each agent, longest for the most commission generated, with what is still owed to them.

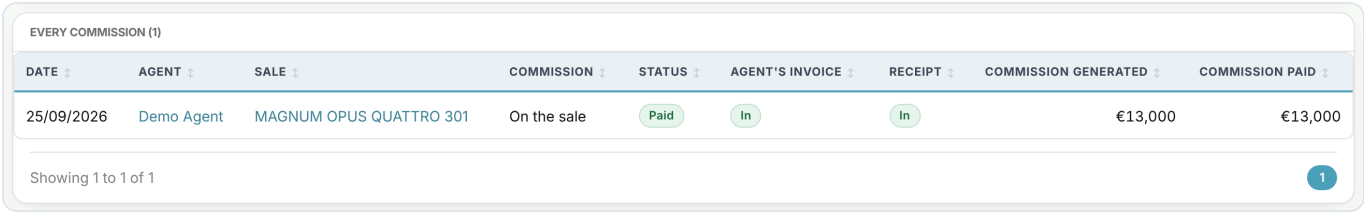

Agents

Every agent with their company, commission rate, number of sales, value signed for, commission generated, paid and outstanding. Click a name to open the agent.

Every commission

One row per commission, newest first, 10 a page: the date, the agent, the sale, the kind of commission, its status, and whether the agent's invoice and receipt are In, Missing or Not yet (not yet means nothing is paid so no paper is expected). Then the amount generated and the amount paid.

REPORT 2.3

Leads

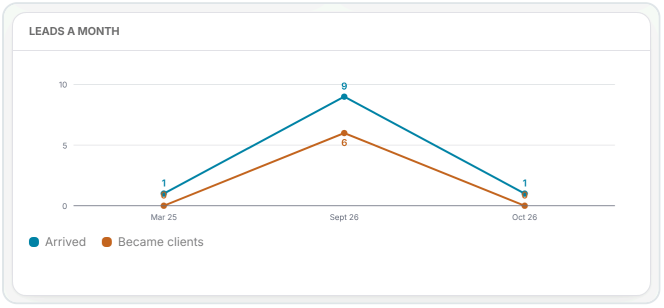

Where leads come from and how many become buyers. It opens on the last 12 months and counts the leads that arrived in the period.

Leads	Leads that arrived in the period.
Became clients	Of those, how many were turned into clients.
Leads that became clients	The same as a percentage.
Signed a contract	How many went on to sign a contract, and their share of the leads.

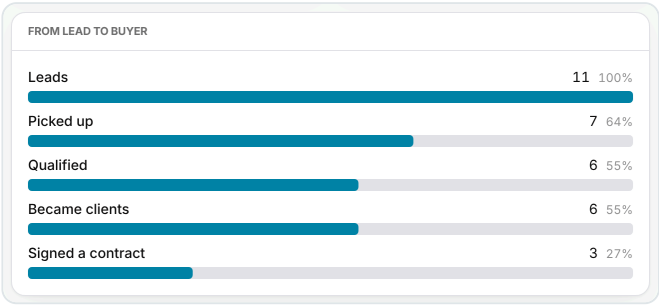

Leads a month

A line chart: the leads that arrived each month against those that became clients, with the number on each point. Months with nothing are left out.

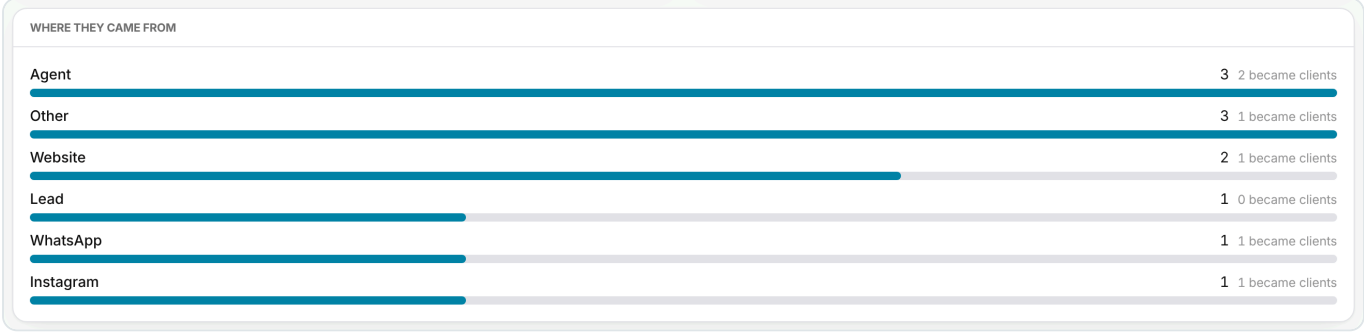

From lead to buyer

Each step with its count and its share of the leads: Leads, Picked up, Qualified, Became clients, Signed a contract.

Where they came from

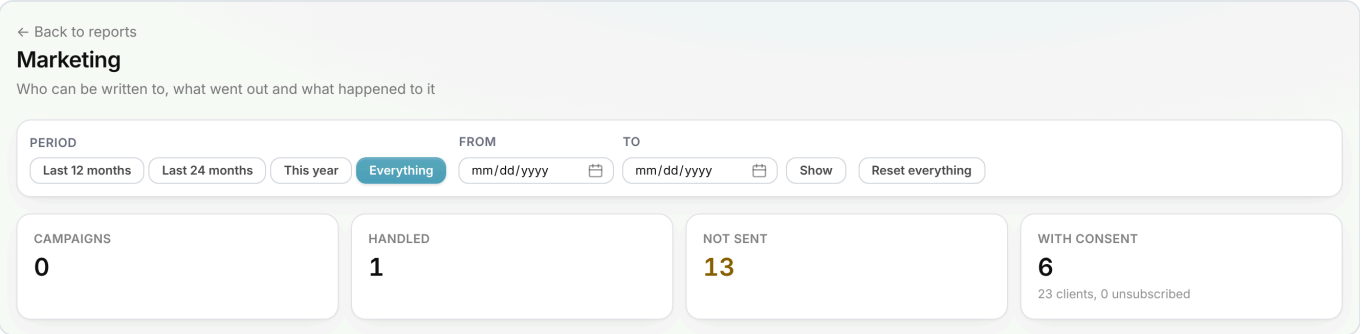

Leads by source (agent, website, WhatsApp, Instagram and so on), most first, with how many from each became clients. It shows which channels bring buyers, not only enquiries.

REPORT 2.4

Marketing

Who can be written to, what went out and what happened to it. It opens on the last 12 months.

Campaigns Campaigns sent in the period.

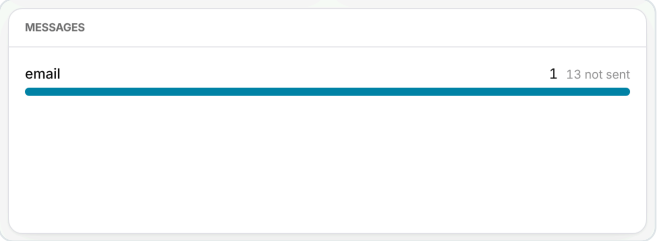

Handled Emails and messages the CRM sent successfully in the period, automatic ones included.

Not sent Those the mail server refused or that failed. Shown in orange when there are any.

With consent Clients who agreed to receive marketing, out of all clients, and how many unsubscribed. This is today's count, not the period's.

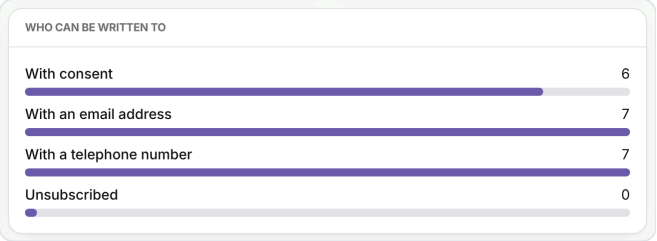

Messages

Messages handled by channel (email, WhatsApp), with the number not sent beside each.

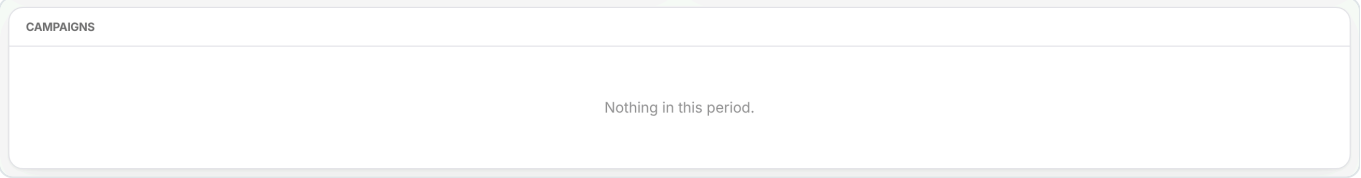

Who can be written to

Clients with consent, with an email address, with a telephone number, and unsubscribed.

Campaigns

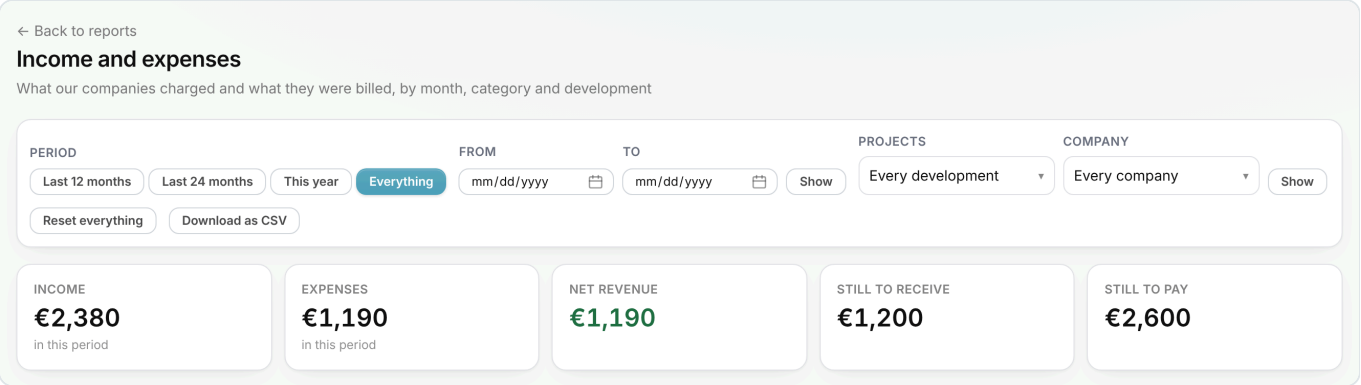

Each campaign of the period: its name, who gets it (clients, agents, shareholders, leads), how it was sent, how many were handled and not sent, its status and date. The test copy has no campaign in the period, so the table is empty.

REPORT 2.5

Income and expenses

What our companies charged and what they were billed: the invoices under Invoices, Company, by month, category and development. Buyers' payments are not here; they are in Apartment Sales. It opens on the last 12 months and counts each invoice by its date.

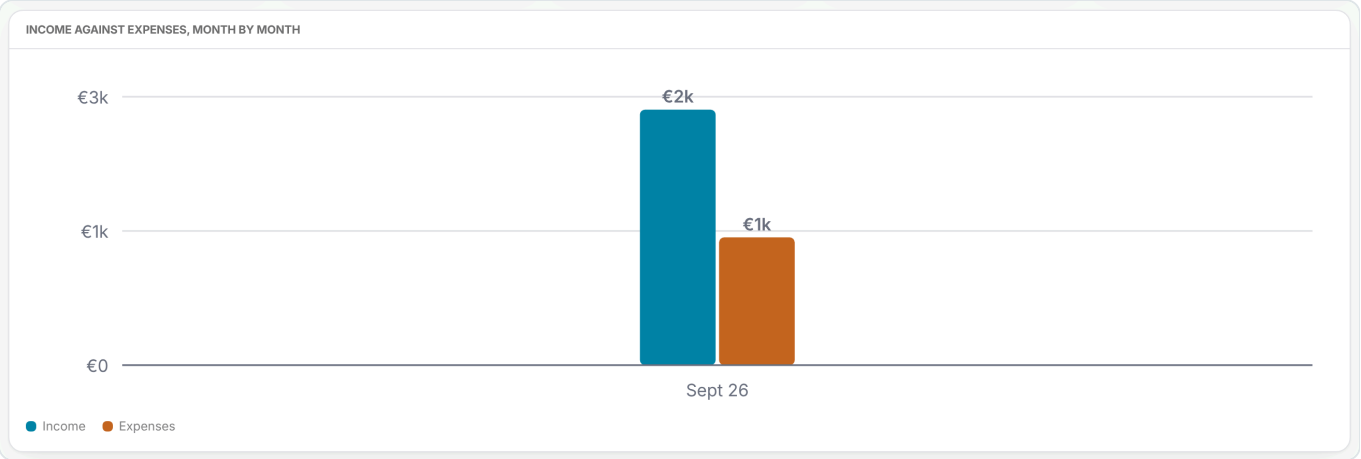

Income	The total of the invoices our companies issued in the period.
Expenses	The total of the bills our companies received in the period.
Net Revenue	Income less expenses. Green when positive, red when negative.
Still to receive	What is unpaid today on the invoices we issued, with how many are overdue.
Still to pay	What we still owe today on the bills we received, with how many are overdue.

Still to receive and Still to pay are today's totals and do not follow the filters.

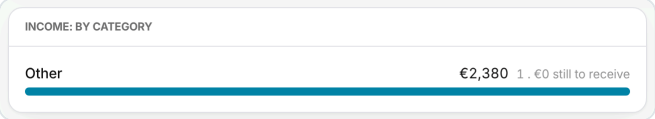

Income against expenses, month by month

A bar for each, for every month that has data, with the amount on top of each bar.

Income by category

Income split by the category on the invoice, with how much of it is still to receive.

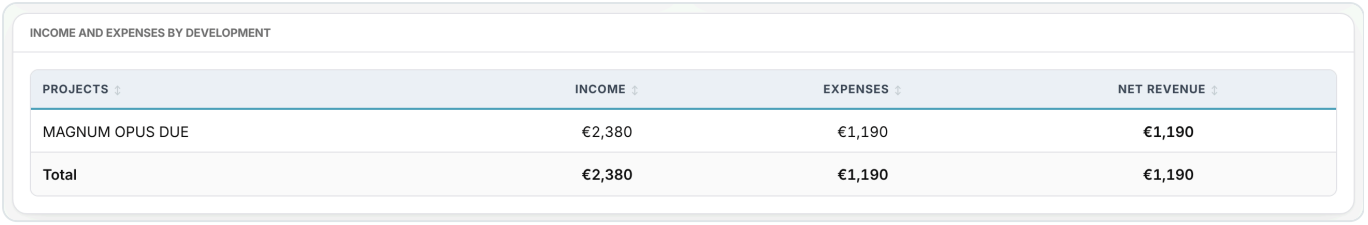

Expenses by category

Expenses split the same way, with how much is still to pay.

Income and expenses by development

Income, expenses and Net Revenue for each development. Invoices with lines for several developments are split by their lines.

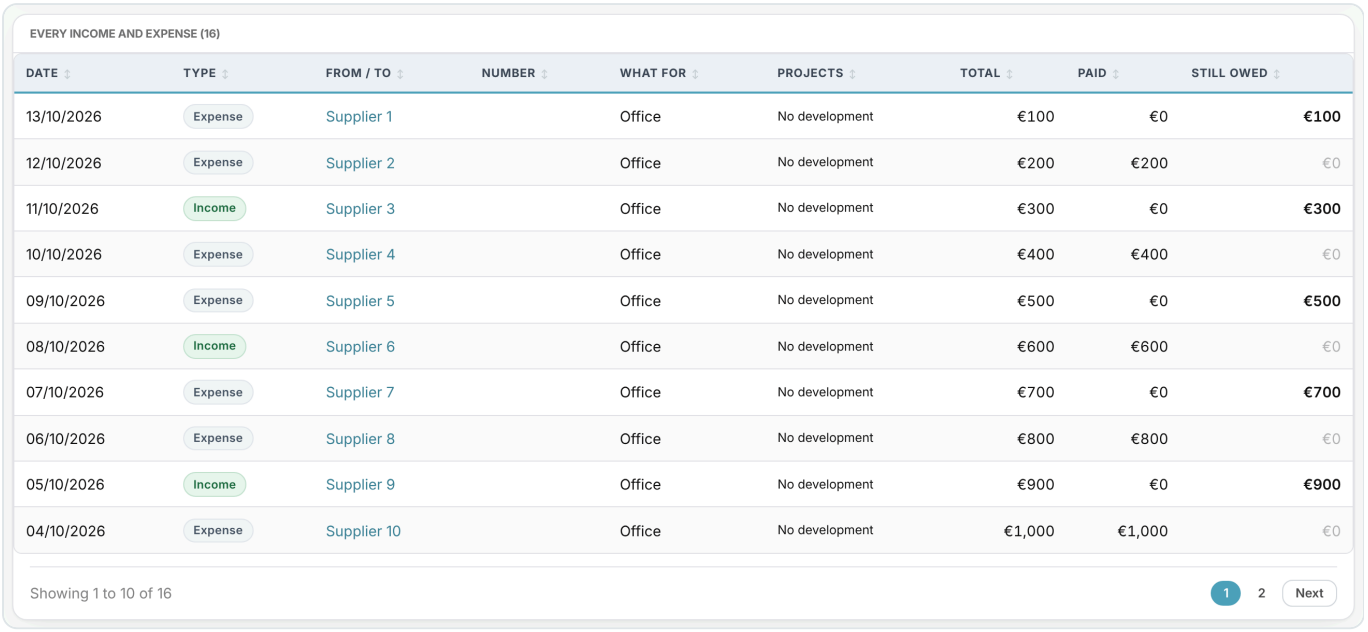

INCOME AND EXPENSES BY DEVELOPMENT

PROJECTS	INCOME	EXPENSES	NET REVENUE

REPORT 2.6

Constructors

What was agreed with each constructor for each development, what was paid, what is pending and what is still to pay. It opens on Everything, and it can be narrowed by development and by constructor, several of each.

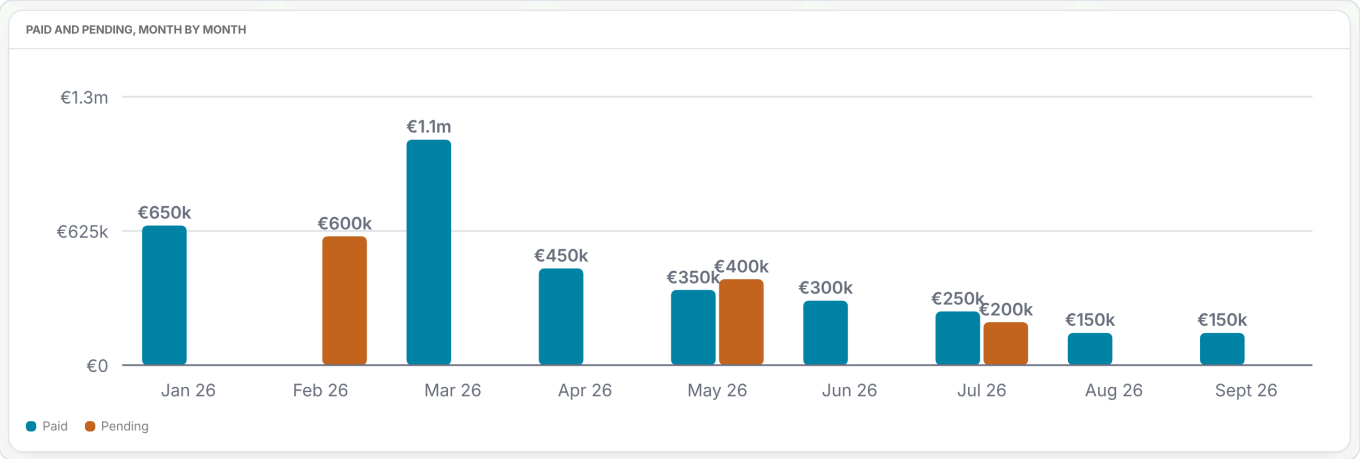

Agreed	The total of the agreements with the constructors, and how many agreements there are.
Paid	Payments marked Paid, and their share of what was agreed.
Pending	Payments entered but not yet marked Paid.
Still to pay	Agreed less paid.
Papers missing	Paid payments still without the constructor's invoice or receipt.

The amounts are as entered. In the test copy one constructor shows paid above agreed (146%) only because of the made up records.

Paid and pending, month by month

Paid payments by the month they were paid, and pending ones by the month they are set for, so coming payments show ahead.

By constructor and development

One row per agreement: the constructor and the development, agreed, paid and its percentage, pending, still to pay and papers missing. Click the constructor's name to open it.

Every payment to a constructor

Newest first, 10 a page: date, constructor, development, kind of payment (the stage), status, and whether their invoice and receipt are in. A paper is expected only once a payment is Paid; before that it says Not yet. Payments entered as history carry a History tag and never count as missing papers.

REPORT 2.7

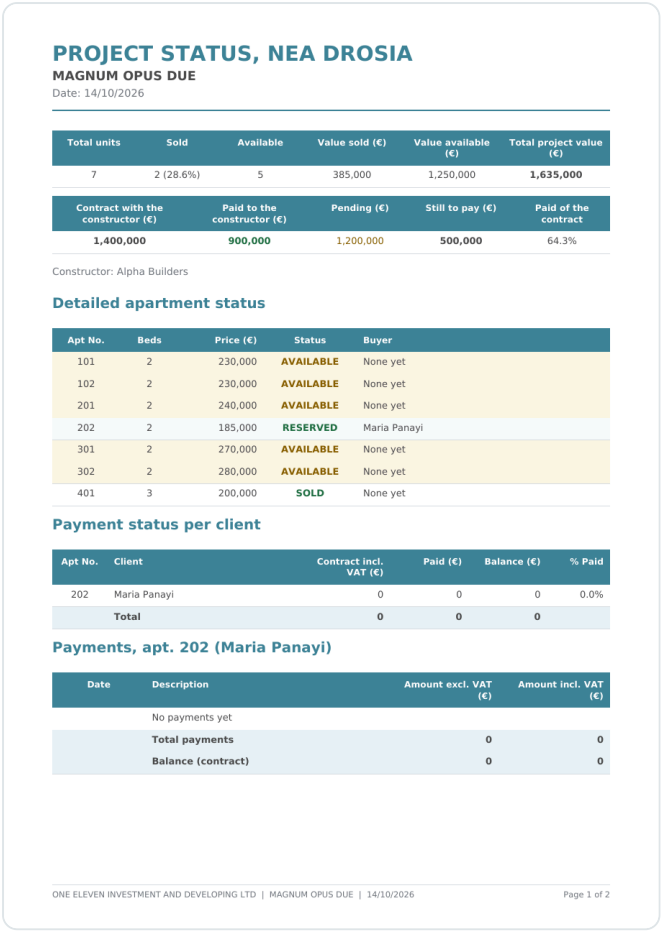

Project status for the shareholders

A ready PDF about one development, to send to the shareholders yourself. Choose the development, press Show, then **Open the PDF** to read it or **Download the PDF** to save it. The cash agreed outside the contracts is never in it.

What the PDF contains

- **The summary:** total units, sold, available, value sold, value available and total value; then the contract with the constructor, paid, pending, still to pay and the share paid.
- **Detailed apartment status:** each apartment with bedrooms, price, status and buyer.
- **Payment status per client:** contract with VAT, paid, balance and percentage paid.
- **Payments per apartment:** each payment with and without VAT, and the balance.
- **Payments to the constructor:** every stage with its amount and status, and the totals.

REPORT 2.8

Shareholders and companies

The money of every development, in and out, VAT included, and the part of it that belongs to the companies and shareholders chosen. It opens on Everything.

Companies	One or more of the companies that hold developments.
Shareholders	One or more shareholders, whether they hold directly or through a company.
Nothing chosen	The whole of every development, at 100%.
Money in	All the positive columns added up.
Money out	All the negative columns added up.
Net Revenue	Money in less money out, for the share chosen.

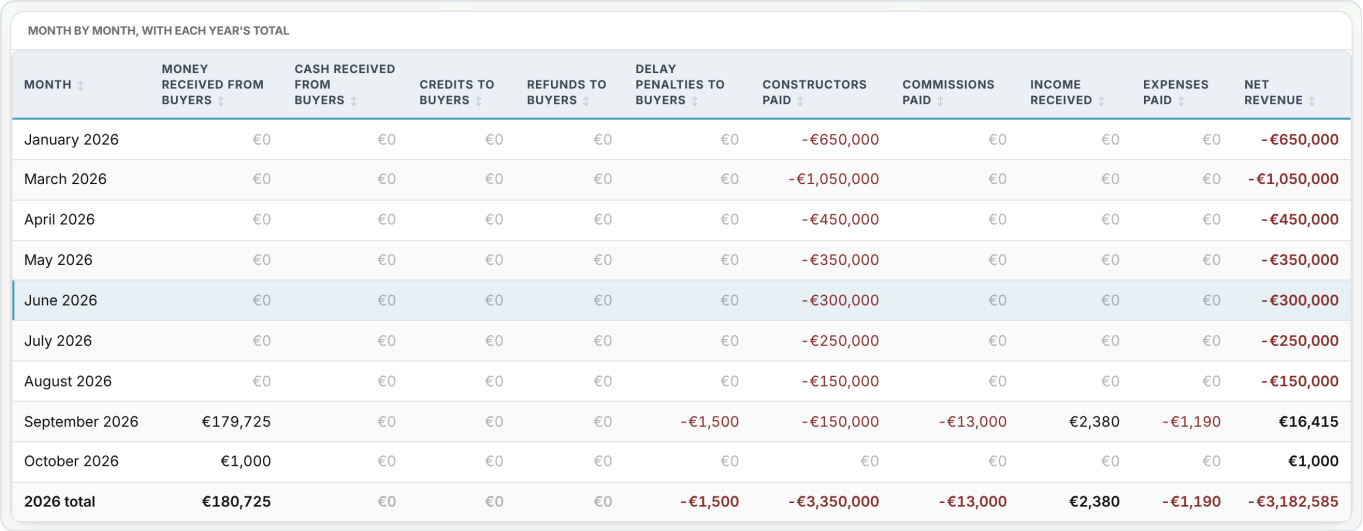

The columns, in order

Every figure is money that actually moved, on the day it moved. Money in is positive, money out negative, and Net Revenue is their sum.

Money received from buyers In	Buyers' payments on their contracts, VAT included.
Cash received from buyers In	Cash received. No VAT.
Credits to buyers Out	VAT paid back after a reduced rate was approved.
Refunds to buyers Out	Other money paid back to buyers.
Delay penalties Out	Penalties paid to buyers for delays.
Constructors paid Out	Payments to the constructor marked Paid, as entered.
Commissions paid Out	Commission paid to agents. It is recorded before VAT, so 19% is added for an agent with a VAT number.
Income received In	Money received on our companies' invoices for the development, VAT included.
Expenses paid Out	Bills paid for the development, VAT included. A fee one of our companies charged the company holding the development counts here as an expense.
Net Revenue	The sum of all the columns.

Month by month, with each year's total

Each month with money in it, then a total row for each year, and a grand total when there is more than one year. It answers "what did our share earn this month and this year".

By development and share

One row per development held by the companies or shareholders chosen. Under the name it shows how the share is held, for example "50% through" a company or "directly". **Share** is the percentage used. When it is under 100%, each amount shows the share in bold and "of" the full amount under it. Commissions are shared only among the companies holding the development, so their share can differ from the others.

Choices to confirm

These four rules were chosen when the report was built. If any of them should work differently, tell ErgonSite and it will be changed.

- 19% VAT is added to commission paid to an agent who has a VAT number.
- Constructor payments are taken as entered, with their VAT.
- A fee one of our companies charged the holding company counts as an expense of that development.
- Commissions are shared only among the shareholders of the companies holding the development.
